

Brainstorming & Idea Prioritization Template

Date	03 June 2026
Team ID	XXXXXX
Project Name	SMART LENDER
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	NAGA NADINI MUMMIDIVARAPU	Build a Flask web app for user-friendly loan application submission and instant prediction.	UI/Deployment	
2	MADDULA RATNAPRIYANKA	Use SMOTE to handle the imbalanced loan dataset to ensure minority classes are not ignored.	Preprocessing	
3	SATYA SAI GOPAL GOLLU	Train multiple models (Decision Tree, RF, KNN, XGBoost) and automate the selection of the best one.	Model Training	
4	GUNA BORRA	Conduct deep EDA with correlation heatmaps to understand variables affecting loan approval.	Analysis	
5	NARAYANA SWAMI CHEREDDY	Serialize the best model (loan_model.pkl) and scaler (scaler.pkl) to keep the Flask app lightweight.	Deployment	

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Lightweight Flask Web App using serialized ML models	High	High	1	Yes
2	Apply SMOTE for class balancing during data preprocessing	High	High	2	Yes
