Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS "I need to know if I'll get approved before I start looking for houses." "The application process is too complicated." "How do they decide who gets a loan and who gets rejected?"	THINKS "Will my past credit history or education level ruin my chances?" "I hope the system evaluating me is fair, unbiased, and accurate." "I wonder if a machine learning model is more reliable than a human officer."
PERSONA NAME <i>(Role / User Type)</i>	
DOES - Searches online for loan eligibility calculators and predictions. - Fills out tedious forms with details like Applicant Income, Co-applicant Income, and Loan Amount. - Hesitates to officially apply at multiple banks to avoid damaging their credit score.	FEELS Anxious about the possibility of being rejected for the loan. Overwhelmed by the financial jargon and application requirements. Relieved if they can get a quick, transparent decision (Loan Approved  or Loan Rejected ) through a simple web app.
