

Solution Architecture

Date	15 March 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	Collects applicant details and displays real-time decision-making outcomes for quicker loan approvals. HTML/CSS (Interfacing with Flask)	Collects applicant details and displays real-time decision-making outcomes for quicker loan approvals. HTML/CSS (Interfacing with Flask)
<i>[API Gateway]</i>	Serves as the web framework to handle incoming user requests and route them to the machine learning model. Python, Flask	Serves as the web framework to handle incoming user requests and route them to the machine learning model. Python, Flask
<i>[Microservices]</i>	Employs machine learning techniques to analyze and predict creditworthiness. It acts as a dynamic and adaptable loan approval system. scikit-learn, pandas, numpy, matplotlib, seaborn, Jupyter Notebook, PyCharm	Employs machine learning techniques to analyze and predict creditworthiness. It acts as a dynamic and adaptable loan approval system. scikit-learn, pandas, numpy, matplotlib, seaborn, Jupyter Notebook, PyCharm
<i>[Database]</i>	Provides disk space for data, models, and logs. Stores the initial training data from Kaggle and UCI. 1 TB SSD, .csv files	Provides disk space for data, models, and logs. Stores the initial training data from Kaggle and UCI. 1 TB SSD, .csv files
