Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	The applicant visits the home page and fills out their financial details.	The applicant submits the form and waits for the prediction.	The applicant reads their prediction result (Loan Approved ☒ or Loan Rejected ☒).
Touchpoint <i>What part of the service do they interact with?</i>	Web UI: / (home.html) and /predict (predict.html).	Backend Endpoint: /submit POST request.	Web UI: submit.html.
Customer Thought <i>What is the customer thinking?</i>	"What specific income and education details do I need to provide?"	"I hope my income is high enough and the model evaluates me fairly."	"Will the actual bank honor this machine learning prediction?"
Customer Feeling <i>What is the customer feeling?</i>	Curious but slightly overwhelmed by the form fields.	Anxious and hopeful while the data is processing.	Relieved (if approved) or Disappointed (if rejected).

Process Ownership <i>Who is in the lead on this?</i>	Frontend/Flask App (app.py).	ML Pipeline (preprocessing.py and train_model.py).	Frontend/Flask App (app.py).
Opportunities	Add helpful tooltips explaining terms like "Applicant Income".	Display a loading animation so the user knows the ML model is running.	Provide tips on how to improve their chances if the loan is rejected.
